This Spring, you can help patients like Sonia access the healthcare services they need at Ravenswood. Since 2018, Sonia has received a variety of services at Ravenswood. It all started when Sonia had her first dental visit at Ravenswood’s dental clinic.

At her dental appointment, Sonia’s dentist informed her of Ravenswood’s wide range of services— including family medicine and women’s health. After learning this, Sonia made a medical appointment since she had been trying to have another child for a few years. At Sonia’s medical appointment, she shared this challenge with Dr. Mokaya, who then connected Sonia and her husband to the appropriate services. Finally, at Sonia’s last appointment with Dr. Mokaya, Sonia learned that she was pregnant!

During Sonia’s first prenatal screening, Dr. Mokaya referred Sonia to counseling and CenteringPregnancy®, which provides group prenatal care. In CenteringPregnancy, pregnant women who are due around the same time receive prenatal education and exams from trained clinic staff and doctors, such as Dr. Mokaya.

Sonia feels extremely supported by Ravenswood staff and the other pregnant women in CenteringPregnancy. She is so comfortable and confident in Dr. Mokaya’s care that she requested Dr. Mokaya to be her baby’s doctor! After Sonia gives birth, Sonia is excited to join CenteringParenting®, which provides pediatric care and parenting education in a group-care model during the child’s first two years of life, and will continue using all the services Ravenswood has to offer!

Ravenswood has exceeded my expectations— all the doctors and medical assistants I have come in contact with have treated me well.

– Sonia

I have never been part of a program like this, and I would not change it for anything else.

– Sonia
